

High Performance Computing and Artificial Intelligence

Position description

The Specialized Operational Scientist will support the development, operation, and utilization of high-performance computing (HPC) infrastructures, as well as the development of software and computational tools aiming at the more efficient allocation of computational resources in Artificial Intelligence techniques. They will participate in the implementation of research and development projects, the optimization of computational applications, and the provision of scientific and technical support to the research groups of INPP.

Level of Position: Special Research Scientist (C level). (In exceptional cases of candidates B level may be discussed before opening the position).
